# High-performance hydraulic oil for ecologically sensitive areas.

## Blahydrol HEPR 46

Since 1936, we have been developing and producing solutions with measurable added value that are gentle to people and the environment.

Blahydrol HEPR 46 is ideal for use in water conservation areas, in the construction, agriculture and forestry industries, and in the municipal sector.

## Biodegradable as per OECD 301B with no loss of performance\*

### Consistently high performance

- Optimal lubrication thanks to good air release
- Targeted additives to maximize service life

### Safe operation

- Minimum possible risk to people and the environment
- Very good filterability
- Excellent electrical conductivity
- Protection of hydraulic system components against corrosion

### Reduced maintenance

- Longer oil and filter change intervals
- Very good sealing and material compatibility
- No unplanned downtime due to system damage, wear or filter blockage

### Versatile

- Wide temperature application range
- Miscible and compatible with mineral oil-based and synthetic hydraulic oils

\* Compared to hydraulic oils that are not biodegradable

Test us. It's worth it.
